QUICK GUIDE

Welcome to the growing family of the Azeron keypad owners!
Thank you for purchasing the keypad directly from its developer.
Your purchase supports us in further development.

STEP 1

Adjust the keypad to your hand. Use the included screwdriver to loosen and tighten the screws.

STEP 2

Go to azeron.eu/downloads and download the latest Azeron software. Install it on your PC. To learn more about the software, go to azeron.eu/cyborg2setup and open the manual.

STEP 3

Plug in the USB-C cable in the keypad and the PC. Launch the Azeron software to set up the keybinds.
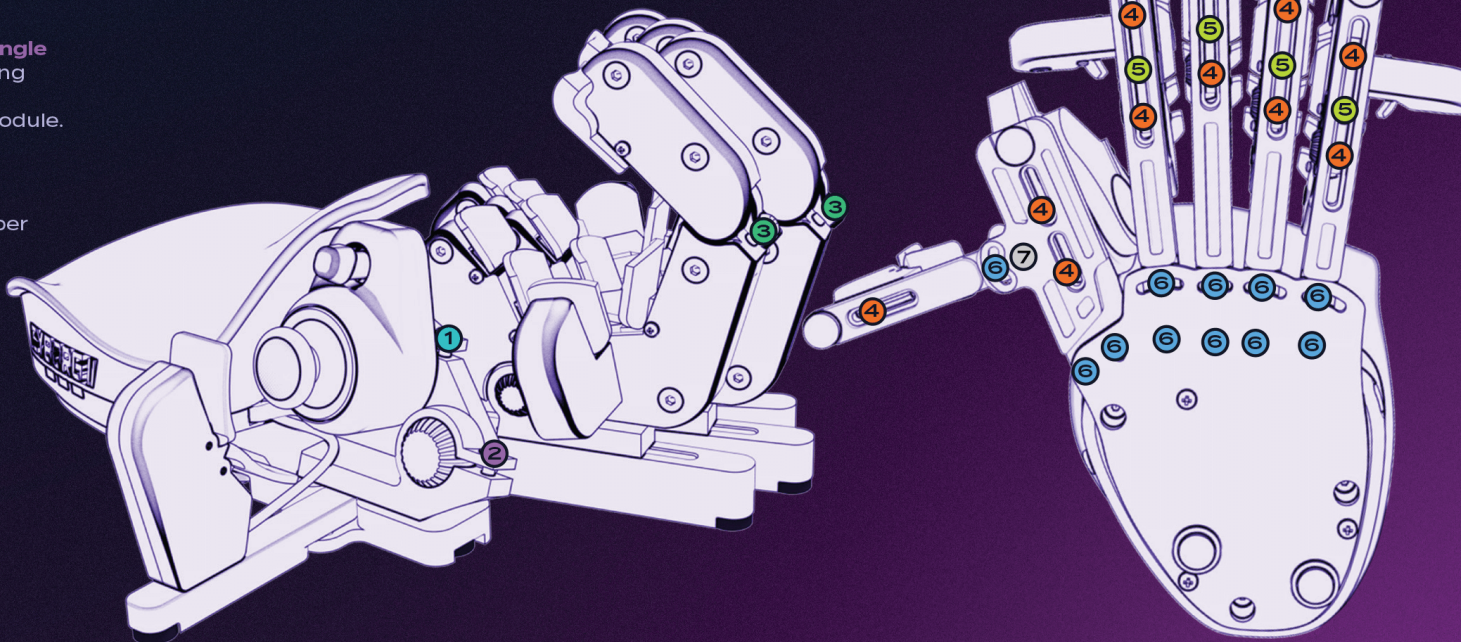

1 Thumbstick rotation
Rotate the thumbstick / 5-way switch part.

2 Thumbstick angle
Adjust the tilting angle of the thumbstick module.

3 Tower tops
Adjust the upper tower keys.

4 Tower distance
Adjust the distance from a tower to the palmrest.

5 Tower angles
Adjust the angle of each tower

6 Rail placement
Adjust the angle between tower rails.

7 Missing screw?
This screw is removed for safer shipping. It is included in the package.

Please be gentle and protect your keypad from prolonged heat (like having it in a hot car)!
If you have any questions or experiencing any problems, do not hesitate to contact us at info@azeron.eu
HAVE FUN GAMING!
